INTRODUCTION

THE LONDON TRACK

In 2016 **Shell Eco-marathon Europe** comes to London, UK for the first time in our successful 30-year-history. The competition will be located around the iconic Queen Elizabeth Olympic Park, from 30 June to 3 July, 2016.

The new urban track in one of the largest and most important cities in the world will present even more challenges to the student teams.

Make sure your vehicle is designed for this type of track, adapting the steering system, brake efficiency and stability. It's also important that the driver is well-prepared and trained to drive your vehicle.

If you have questions or need more information, please contact us on shell-eco.marathon@shell.com. You can also share your question on the [Europe Facebook group](#).

Good luck to all teams and see you in London!

Gilles Vanier

Shell Eco-marathon Europe Technical Director
