SECURITY

IMPORTANT TELEPHONE NUMBERS

In case of emergency, call: **999** or **112** from a non-UK number

For non-emergency situations, call: **+44 20 7230 1212** or **101**

GENERAL PRINCIPLES

Effective personal security is enhanced by following the 3As principle:

- Awareness: Knowledge and understanding of the security threats and what can be done to reduce risks;
- Alertness: Being alert to what is happening around you; and
- Attitude: Including security as part of your daily routine.

IMPORTANT ADVICE

- Use the free shuttle buses provided for Shell Eco-marathon Participants;
- Prepare and consider your travel arrangements carefully and ensure someone knows where you are going, who you are with and when you might be home;

- Look as assertive as you can, walk with confidence and be aware of your surroundings and who is around you;
- Avoid short cuts and dark isolated areas, vary your routine and be discreet handling cash, phones and wearing jewellery in a public place;
- Never take your safety for granted and look after your friends so that they don't become vulnerable. Remember your personal safety is more important than your phone or other valuables;
- Keep your bags close to you and secured with zips closed. Check your belongings and your pockets regularly;
- Wearing headphones and talking on the phone can make you unaware of your immediate surroundings this makes you appear vulnerable and gives an advantage to a criminal;
- If you use a cash point or ATM be suspicious if you see someone hanging around, if in doubt use another cash machine and have a friend watch your back;
- If you feel uneasy about an individual or situation, trust your instincts and leave the area and head towards a public place such as a shop;
- Pre book a licensed cab to pick you up or use a mini cab office. Never get into a mini cab off the street they are illegal and often uninsured and dangerous; and
- Create a list of important contact numbers (such as banking details, card numbers, passport number etc.) you may need in the case of emergency and keep this list secure and separate from your possessions.

3. AFTER THE COMPETITION

All Teams are required to wait until Sunday, July 3, 17:00 to begin packing up their equipment and leaving the Paddock.

PARTICIPANT CHECK-OUT

The Participant check-out process (located at the Participant Information desk) will begin on Sunday, July 3 at 18:00.

Please follow these steps for your Team's check-out:

- Pack up your equipment and clean your garage as much as possible;
- Keep your vehicle's transponder with you;
- Come to the Participant Information desk with your transponder and track access vests; and
- A check-out volunteer will come with you to your garage and check there is no damage and nothing missing.

If you are camping on Sunday night, pack your crate in the Paddock as much as possible. On Monday morning, make sure you pack all camping equipment and get it back to your crate before 09:00.

If you are planning on taking a ferry back home, we recommend booking it on Monday, not Sunday night, as we cannot guarantee your Team will leave in time to catch the ferry Sunday night.

TRAVEL ALLOWANCE

Teams present at the competition in London will receive their travel allowance via bank transfer, on the bank account indicated in the invoice completed during Phase 3. Please allow several weeks, even months, for the transfer to go through, as this takes time to process.

RESULT CERTIFICATES

Teams will be able to download their Result Certificates in the [Registration system](#) in the week following the competition.

4. MAKE THE FUTURE

Make the Future is a festival of ideas and innovations that supports bright energy ideas and provides a platform for innovation, collaboration and conversation about the global energy challenge. It is a four-day event that will take place at Queen Elizabeth Olympic Park in London, June 30-July 3, 2016.

The event is open to the general public, is free of charge, and will have experiential activities for all ages. Through virtual reality experiences and hands-on science experiments visitors will explore what is happening now and what the future of energy might look like, from renewable energies to natural gas or low-carbon technologies. Visitors will also be able to interact and play with how we can use and create energy in everyday life.

You can find out more about Make the Future [online](#).
